Growing beauty together:
Beautiful ornamental shrubs
for a greener world!

Specialized in ornamental shrubs

Roos Nurseries is a modern and dynamic company that is specialized in the cultivation of ornamental shrubs to supply the national and international markets with visually high-quality products.

Over the years, the company has grown to 6 hectares of greenhouse production and 3 hectares of outdoor cultivation, spread across the main location in Boskoop and several other locations in the Netherlands and Poland. With more than 30 permanent employees, we ensure every day that our plants reach our customers in top quality and optimal condition.

Mission Statement

The mission of Roos Nurseries is to work Together on our nurseries to produce a Green and Affordable product that results in Sustainability and Joy for People and the Environment.

Growing Beauty Together: Beautiful Ornamental Shrubs for a Greener World

Sustainable future

The substrate recipes we use are supplied by our supplier Klasmann Deilmann. Together with them, we are making our substrate increasingly sustainable by using alternative raw materials. In this way, we are gradually reducing the proportion of peat

and replacing it with more sustainable alternatives. The aim of these tests with new substrate mixes is to make our substrate more sustainable and to reduce the share of peat.

Our supplier of pots and trays is Modiform. Together with Modiform, we continuously search for the best possible pot for cultivation and for the growth of the plant. In addition, we always choose trays that provide optimal and safe loading of our pots for the most efficient transport possible. All our pots are made from recycled material and can be recycled through household waste, ensuring maximum contribution to closing the material loop. We grow various products in concept pots to highlight the plant's specialty.

Customers can come to us for both small and large custom orders. The plants can be packaged in various ways on CC containers, in boxes, with trays, with price stickers; there are many possibilities at our company. In addition to specific customer requests, we also offer our products via various online webshops, including Floriday. Floriday is updated weekly with stock and recent photos, ensuring you are always informed of our most current assortment.

Would you like more information about participating in Floriday, about specific products, or do you have other questions? Our staff will be happy to assist you.

Also available in C7.5 and C10

Daphne od. 'Perfume Princess'®

The beautiful Daphne 'Perfume Princess'® is a real 'must have'. But why? The flowers from the Perfume Princess are four times bigger than the other varieties. It is also the earliest and longest flowering variety of all Daphnes! The flower grows from the bottom of the stem all the way to the top. But the biggest surprise of this plant is the great smell that the flower gives. The Daphne 'Perfume Princess'® is evergreen. These special plants are from the breeders of Anthony Tesselaar Plants Pty. Ltd, a horticultural project management company based in Australia.

Elaeagnus ebb. 'Compacta'

The Elaeagnus ebb. 'Compacta' is a compact, evergreen shrub with silvery-green leaves and a striking silver underside. Thanks to its dense and regular growth habit, this shrub is ideal for planting as a hedge, creating a beautiful, structured green screen. This variety is also highly tolerant to salty coastal winds, making it perfect for coastal areas. Its evergreen foliage retains its silvery appearance throughout the year, providing a consistently attractive look. In addition, the Elaeagnus ebb. 'Compacta' is hardy and low-maintenance, making it a durable and hassle-free choice for hedges and other garden structures.

Magnolia 'Fairy'®

The Fairy Magnolia® is not just a normal Magnolia. The Fairy varieties are special! They are very bushy and they are evergreen. In the spring they cover themselves in a sea of flowers. All these flowers have a wonderful scent. The Magnolia Fairy® has a great reputation because it grows quick and easily. The Magnolia 'Fairy'® varieties are from the breeders of Anthony Tesselaar Plants Pty. Ltd, a horticultural project management company based in Australia.

Magnolia 'Fairy'® Honey Velvet

Fairy Magnolia® Honey Velvet is a beautiful Magnolia. Fairy Magnolia® Honey Velvet smothers itself in soft, honey-cream flowers. Growing to around 3 to 4 metres in height, this evergreen magnolia has dense round glossy foliage, making it an excellent choice as a boundary hedge, to screen out the street or neighbours; or plant in groups to provide maximum impact. Large containers planted with a Fairy Magnolia® Honey Velvet will also impress! You can trim it to shape if you wish, however it is a compact growing shrub that requires little maintenance. Fairy Magnolia® Honey Velvet flowers from March through to May.

Philadelphus Petite Perfume®

The Petite Perfume® is a compact, highly fragrant shrub that's perfect for smaller gardens. With its stunning pink or white flowers, it fills the air with a sweet, jasmine-like scent from late spring to early summer. It's not just its fragrance that stands out, but also its ability to attract pollinators such as bees and butterflies.

The Petite Perfume® is loved for its dense growth habit, making it ideal for creating low hedges or as an accent plant in your garden. It's easy to grow and maintenance-friendly, ensuring a delightful display season after season.

The Petite Perfume® is a license variety from Plantipp which are specialized in royalty management and managing new varieties.

Sarcococca hum. 'Winter Gem'®

The Winter Gem® has shiny dark green leaves and beautiful white flowers which blooms from February to April. They spring from deep red buds and spread a fantastic scent.

Key points for the Sarcococca 'Winter Gem'® are:

- Bright white flowers
- Dark red buds
- Very nice scent
- Disease-tolerant
- Good branching habit

The Winter Gem® is a license variety from Plantipp which are specialized in royalty management and managing new varieties.
